

TestSafe Chronicles

The TestSafe Review has been completed with the WorkCover Board endorsing the recommendations made by Julie Newman, Chief Financial Officer and John Watson, General Manager of OHSD. An Implementation Group has been formed and a plan is currently being drafted up.

TestSafe recently had the pleasure of a visit from Comcare Inspectors. They spent the morning visiting the site and speaking to our experts on investigations. We look forward to forming a business relationship with them in the future.

This year saw the NSW Govt introduce two new major initiatives (The Graduate Engineering & Public Sector Cadetship Programs) for investing in jobs, infrastructure and industries that will boost the NSW economy. TestSafe was lucky to be part of both of these programs with

Jana Zeman commencing in February as our Mechanical Engineer and Kaylee Byrnes commencing in August as part of the Cadetship. Both ladies are very enthusiastic to be part of the TestSafe Team.

At the recently held Australian Institute of Occupational Hygienists (AIOH) Conference TestSafe presented

a technical poster on hydroxypyrene analysis and won third prize. A fantastic outcome for us. TestSafe also presented a scientific paper plus mounted a great trade display. Well done to Jimmy Hu and Greg O'Donnell for the poster, Greg and

Jim Hurst for the scientific paper on measurement uncertainty, Greg for the half day workshop on quality issues and also to Jeanine Wells for putting together our best ever trade display.
