

. . . . An Extraordinary Employee!

One of our long standing employees recently won an Outstanding Achievement Award under the category of Innovation and Creativity. This award is given to a staff member or team in recognition of the use of creativity and innovation in the development and delivery of tasks/projects that has resulted in quantitative and/or qualitative results.

William was nominated for his extraordinary skill and knowledge in the development and manufacturing of numerous devices and techniques. His contributions have been unique and cost effective and he continually educates and assists management and staff in their functions.

William receiving his award from Jon Blackwell at the CEO Staff Awards on 12/12/05

PROFILE OF WILLIAM STEWART

Technical Officer (Mechanical)

Bill has amassed more than 33 years of public service with TestSafe and is widely recognised particularly by the coal mining industry as a “rope doctor” one of the foremost specialists in the destructive testing and assessment of wire ropes. He is currently a NATA signatory for a wide range of mechanical tests involving wire ropes; trolley jacks, lifting gear including slings and shackles, scaffold couplings, and portable ramps.

In the course of his employment, Bill has conducted specialist investigations of wire rope failures on portable cranes, builder’s hoists, lift, car hoists, and in underground coalmines.
